DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of group II in the reply filed on 10-25-07 is acknowledged. The traversal is on the ground(s) that "claims speak for themselves". This is not found persuasive because it is clear that the group II is drawn to the secondary side self oscillating synchronous rectifier for flux cancellation. Examiner agrees with applicant claim 34 should be properly placed in group I. Therefore group II claims that will be examined is 6, 7, 13-16, 23, 24, and 33.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 6, 7, 13-16, 23, 24, and 33 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Wittenbreder (USPAP 20030205990). Wittenbreder discloses the claimed invention a self -oscillation synchronous rectifier circuit (see figure 43) with flux canceling primary and secondary winding circuitry (see paragraph 165).
